SoundExchange distributes royalties from hundreds of different services. Here are the services that contributed the most to your earnings this distribution.

SoundExchange is a non-profit performance rights organization that collects statutory royalties from satellite and Internet radio, cable radio and similar platforms for streaming sound recordings. The Copyright Royalty Board, which is appointed by The U.S. Library of Congress, has entrusted SoundExchange as the sole entity in the United States to collect and distribute these digital performance royalties on behalf of featured and non-featured recording artists, master rights owners (usually record labels), and independent artists who record and own their masters.

SoundExchange distributes royalties for the public performance of sound recordings pursuant to 17 U.S.C. § 114. SoundExchange pays royalties directly to payees according to splits set forth under federal law as follows: 50% to the copyright owner, 45% to the featured artist, and 5% to the AFM & AFTRA Intellectual Property Rights Fund for distribution to nonfeatured musicians and vocalists. This statement only reflects payments made for the artist's share of the performance royalties.
